

## Repro-Med Signs Agreement with Innovatix, LLC

Chester, NY – November 1, 2005 - Repro-Med Systems, Inc. (OTC Bulletin Board: REPR.OB) of Chester, NY recently announced that a new agreement was signed with Innovatix, LLC of New York, NY for group purchasing services. This new relationship will allow non-acute care providers, particularly in the home infusion community, access to contract pricing on Repro-Med's line of medical products, including the FREEDOM60 - Syringe Infusion System, and the RES-Q-VAC Airway Suction System.

Innovatix, LLC, a full-service group purchasing organization (GPO) and operational management consulting company, serves over 6,000 alternate site providers throughout the United States. Innovatix is a joint venture between a subsidiary of the Greater New York Hospital Association and a subsidiary of Premier, Inc.

Andy Sealton, President of Repro-Med Systems, commented, "While we have worked with other GPOs in the past, Innovatix has the largest presence in the home infusion market, as well as nursing homes, closed door pharmacies, oncology clinics - all of which represent our target markets."

"Innovatix members will appreciate the cost and benefits of using the FREEDOM60 for precise low dose infusion therapy," Sealton explained. "In addition, RES-Q-VAC is a desperately needed product for nursing homes, hospitals, and in-home care during power outages and emergencies. Many patients could have been saved during Hurricane Katrina if they had just had access to an airway suction system."

Dawn Lazear, Innovatix Senior Director, Sales and Customer Service, is confident that members, particularly home infusion providers, will benefit from this new agreement, "We are excited to offer this new selection of products to our non-acute care membership, and look forward to developing our relationship with Repro-Med in 2006."

### About Repro-Med

Repro-Med Systems, Inc. engages in the design and manufacture of medical devices for medical respiratory products and infusion therapy worldwide. Repro-Med manufactures medical devices for a variety of markets including emergency-care, hospital, and home-care. The Company's primary products are RES-Q-VAC and FREEDOM 60.

RES-Q-VAC is currently the market leader for portable suction instruments, providing a complete suction system designed to remove fluids from a patient's airway. As the RES-Q-VAC consists of a hand-held, human powered portable suction pump, it provides its benefits in many markets, being particularly effective in emergency settings. The proprietary design and disposable features of the RES-Q-VAC eliminate the risk of contaminating the health care provider when suctioning a patient or during post treatment cleanup. The product is particularly suited for emergency providers and vehicles, hospitals and as backup support for powered suction systems.

The FREEDOM60 Syringe Infusion Pump provides a portable, high quality, self powered, maintenance free delivery system for ambulatory, home and hospital use, delivering precise infusion rates and uniform flow profiles that provides consistent transfer of medication. The FREEDOM60 is a versatile, easy-to-use lightweight mechanical pump providing a cost-effective alternative to expensive electronic and disposable IV administration devices and may be used to deliver a wide range of infusion products including antibiotics, pain control, chemotherapy drugs, immune globulin, desferal, cardiac drugs, among others.

## Forward Looking Statements

Statements in this press release may contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, may be forward-looking statements. These statements are based on management's current expectations and are subject to uncertainty and changes in circumstances. These statements involve risks and uncertainties that could cause actual results to differ materially from those included in forward-looking statements due to a variety of factors. More information about these factors can be found in Repro-Med's latest Annual Report filed with Securities and Exchange Commission on Form 10-KSB. The company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
